

Dutypoint case study: Leamington Gospel Hall

Dutypoint 

Location:
Leamington Spa

PROJECT SUMMARY

Leamington GHT contacted Dutypoint Systems as they were extending their conference centre and adding additional WCs and wash-hand basins. The current site operated via the mains water but with addition usage, there was a need for on site water storage and increasing the pressure throughout the system.

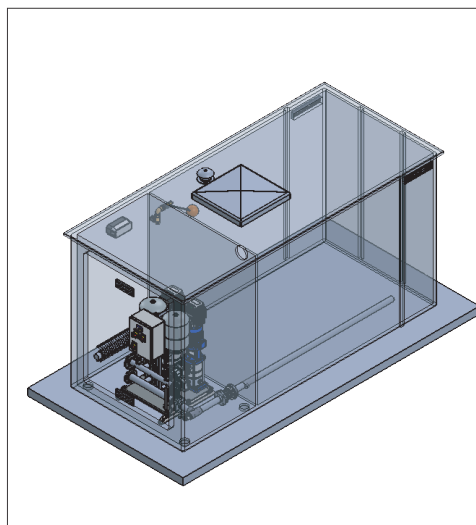

PROJECT CHALLENGE

With a serious lack of plant room space, a standard break tank and booster set wasn't an option.

PRODUCT SOLUTION

Dutypoint Systems QuadraTANK was the perfect option. Providing a single piece break tank and kiosk, suitable for installation externally and available in various sizes to suit whatever application you are working on.

The QuadraTANK installed
at Leamington Gospel Hall
