ALL-IN-ONE PACKAGED PLANT ROOM SOLUTIONS

SAVE TIME AND SPACE WITH OUR PACKAGED PLANT ROOMS

Harton POD

A prefabricated, fully sealed, below-ground cold-water storage tank and booster set plant room made from durable GRP. The Harton POD is a compact and cost-effective solution for plant space. Dutypoint has built on the Harton legacy product design by introducing additional features and re-sourcing key components to deliver a more robust and easily maintained system.

PRODUCT OVERVIEW

- Wide range of sizes and options to suit various applications
- Factory-assembled, fully-sealed unit to reduce on-site labour
- Available as cold-water booster and tank only or including water treatment and/or optional segregated cat 5 system
- Fixed internal ladder access with retractable access aid post

Optimise™

The Dutypoint Optimise™ packaged plant room provides a cost-effective, safe and efficient solution to plant room space and for installing water systems underground. By combining industry-leading technologies, Dutypoint can offer a system that overcomes many of the challenges associated with underground plant rooms and offers unique safety features and ease of maintenance.

PRODUCT OVERVIEW

- Structural stability to enable installation in heavy loading areas
- Pre-installed shuttering system to minimise the volume of concrete required to install
- Full-size staircase for easy access once installed
- Fast and safe installation
- Self-contained structural design

Bespoke packaged units

Dutypoint offers a wide range of bespoke prefabricated solutions, working with clients from design to commissioning. These systems are designed specifically project by project, and we can include booster sets, storage tanks, hot-water generation and category 5 systems.

We offer a complete internal design and manufacture, enabling us to install, test and pre-set parameters of the full system off site and ready to drop into place on your project. In addition, we collaborate with you to provide a seamless solution to the challenges your projects face, reducing hassle, time and costs on site.
