#### VT2-05-022

#### **Product Description**

The Dutypoint VT is a cost effective commercial and industrial booster set, designed to be both affordable to purchase and simple to maintain over its lifespan.

The VT features high specification AISI 304 stainless steel vertical multistage pumps with oversized bearings to reduce wear and decrease vibrations from moving parts.

The system is designed to be straightforward to maintain, both electrically and mechanically, for maintenance or replacement while the booster set is operating.

AS	WRAS Approved, All products in the new VT Cold Water				
WRAS	Pressure Booster range are fully WRAS approved.				
Control Panel	Variable speed pumps				
	<ul> <li>Hand / Off / Auto Settings for emergency situations.</li> </ul>				
ol P	Volt free contacts for :				
ıţı	- Common fault				
ပိ	- Low water level				
	- High water level				
	Anti-Seize technology which rotates all pumps during low or				
	zero usage and prevents the pumps from seizing up.				
	Burst pipe protection which constantly monitors the system				
	for signs of major leakage. If detected, an alarm is activated				
	followed by full system deactivation if the required duty is still not met.				
	Cyclic duty changeover which ensures even wear across all				
Protection	pumps in the system.				
otec	Low Water Protection technology which deactivates the				
P	pumps if there is no water in the break tank, protecting				
	against dry running.				
	HiRISE technology which protects the building's pipework by				
	ensuring the pumps start slowly during the initial fill process				
	or following power failure to prevent potentially dangerous				
	surges and consequent damage to the riser.
