VT2-15-030

Product Description

The Dutypoint VT is a cost effective commercial and industrial booster set, designed to be both affordable to purchase and simple to maintain over its lifespan.

The VT features high specification AISI 304 stainless steel vertical multistage pumps with oversized bearings to reduce wear and decrease vibrations from moving parts.

The system is designed to be straightforward to maintain, both electrically and mechanically, for maintenance or replacement while the booster set is operating.

ΑS	WRAS Approved, All products in the new VT Cold Water	
WRAS	Pressure Booster range are fully WRAS approved.	
Control Panel	Variable speed pumps	
	 Hand / Off / Auto Settings for emergency situations. 	
lo F	Volt free contacts for :	
nt	- Common fault	
ပိ	- Low water level	
	- High water level	
	 Anti-Seize technology which rotates all pumps during low or 	
	zero usage and prevents the pumps from seizing up.	
	Burst pipe protection which constantly monitors the system	
	for signs of major leakage. If detected, an alarm is activated	
	followed by full system deactivation if the required duty is still not	
	met. • Cyclic duty changeover which ensures even wear across all	
Protection	pumps in the system.	
otec	Low Water Protection technology which deactivates the	
Pre	pumps if there is no water in the break tank, protecting	
	against dry running.	
	HiRISE technology which protects the building's pipework by	
	ensuring the pumps start slowly during the initial fill process	
	or following power failure to prevent potentially dangerous	
	surges and consequent damage to the riser.	

Specification

Suction connection	DN80
Delivery connection	DN80
Max operating flow (per pump)	7.8 l/s
Max operating pressure	3.4 bar
Closed valve pressure	3.8 bar
Maximum system pressure rating	10 bar
Speed	Variable
IP rating	IP55
Motor power	3 kW
Weight	TBA kg
Weight Pressure vessels N° x [Litres]	TBA kg

Electrical Data

Single Phase 1# Variant		
Operating speed range	30 - 60Hz	
Per pump Current @ Full Load	10.4 A	
Total Current @ Full Load	20.8 A	

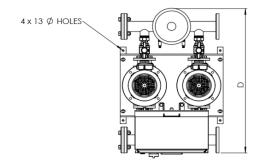

Three Phase 3⊕ Variant		
Operating speed range	30 - 60Hz	
Per pump Current @ Full Load	6 A	
Total Current @ Full Load	12 A	

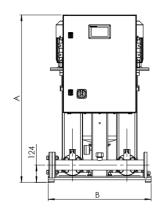

VT model Codes

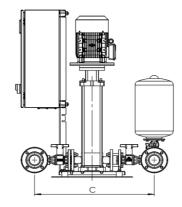

VT2-15-030T

Number of pumps	<u> </u>
Nominal flow (m³/h)	
Motor kW per pump	
Power supply
