### **PRODUCT DATA SHEET**

## VT3-15-040

#### **Product Description**

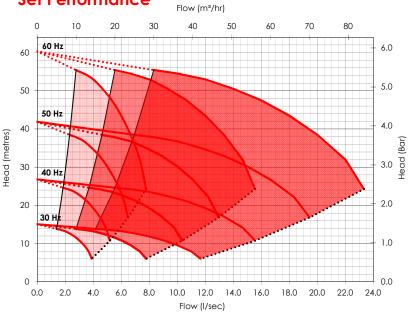

The Dutypoint VT is a cost effective commercial and industrial booster set, designed to be both affordable to purchase and simple to maintain over its lifespan.

The VT features high specification AISI 304 stainless steel vertical multistage pumps with oversized bearings to reduce wear and decrease vibrations from moving parts.

The system is designed to be straightforward to maintain, both electrically and mechanically, for maintenance or replacement while the booster set is operating.

| -             |  |  |  |
|---------------|--|--|--|
| 'RAS          | WRAS Approved, All products in the new VT Cold Water     Pressure Booster range are fully WRAS approved. |  |  |
| ≥             | Tressure booster runge are rung which approved.  |  |  |
| _             | Variable speed pumps   |  |  |
| Control Panel | <ul> <li>Hand / Off / Auto Settings for emergency situations.</li> </ul>                                 |  |  |
|               | • Volt free contacts for :   |  |  |
| ntr           | - Common fault   |  |  |
| ů             | - Low water level  |  |  |
|               | - High water level   |  |  |
|               | • Anti-Seize technology which rotates all pumps during low or  |  |  |
|               | zero usage and prevents the pumps from seizing up.   |  |  |
|               | • Burst pipe protection which constantly monitors the system   |  |  |
|               | for signs of major leakage. If detected, an alarm is activated   |  |  |
|               | followed by full system deactivation if the required duty is still not                                   |  |  |
|               | met.   |  |  |
| ion           | <ul> <li>Cyclic duty changeover which ensures even wear across all<br/>pumps in the system.</li> </ul>   |  |  |
| Protection    | Low Water Protection technology which deactivates the  |  |  |
| Pro           | pumps if there is no water in the break tank, protecting   |  |  |
|               | against dry running.   |  |  |
|               | • <b>HiRISE</b> technology which protects the building's pipework by                                     |  |  |
|               | ensuring the pumps start slowly during the initial fill process  |  |  |
|               | or following power failure to prevent potentially dangerous  |  |  |
|               | surges and consequent damage to the riser.   |  |  |
| 1             |  |  |  |

### Set Performance

### **Specification**

| Suction connection                | DN100            |
|-----------------------------------|------------------|
| Delivery connection               | DN100            |
| Max operating flow<br>(per pump)  | 7.8 l/s          |
| Max operating pressure            | 5.4 bar          |
| Closed valve pressure             | 5.9 bar          |
| Maximum system pressure<br>rating | 10 bar           |
|                                   |                  |
| Speed                             | Variable         |
| Speed<br>IP rating                | Variable<br>IP55 |
|                                   |                  |
| IP rating                         | IP55             |
| IP rating<br>Motor power          | 1P55<br>4 kW     |

## **Electrical Data**

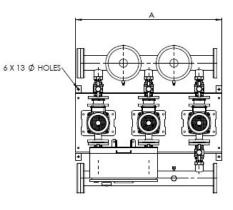

| Single Phase 1 Variant       |           |  |
|------------------------------|-----------|--|
| Operating speed range        | 30 - 60Hz |  |
| Per pump Current @ Full Load | 13.2 A    |  |
| Total Current @ Full Load    | 39.6 A    |  |

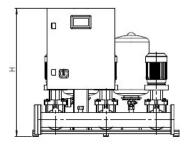

| Three Phase 3 Variant        |           |  |
|------------------------------|-----------|--|
| Operating speed range        | 30 - 60Hz |  |
| Per pump Current @ Full Load | 7.6 A     |  |
| Total Current @ Full Load    | 22.8 A    |  |
