VT3-20-075

Product Description

The Dutypoint VT is a cost effective commercial and industrial booster set, designed to be both affordable to purchase and simple to maintain over its lifespan.

The VT features high specification AISI 304 stainless steel vertical multistage pumps with oversized bearings to reduce wear and decrease vibrations from moving parts.

The system is designed to be straightforward to maintain, both electrically and mechanically, for maintenance or replacement while the booster set is operating.

AS	 WRAS Approved, All products in the new VT Cold Water
WRAS	Pressure Booster range are fully WRAS approved.
	Variable speed pumps
Control Panel	 Hand / Off / Auto Settings for emergency situations.
ol P	Volt free contacts for :
ntr	- Common fault
ပိ	- Low water level
	- High water level
	 Anti-Seize technology which rotates all pumps during low or
	zero usage and prevents the pumps from seizing up.
	Burst pipe protection which constantly monitors the system
	for signs of major leakage. If detected, an alarm is activated
	followed by full system deactivation if the required duty is still not
	met.
2	Cyclic duty changeover which ensures even wear across all
Protection	pumps in the system.
ote	Low Water Protection technology which deactivates the
P	pumps if there is no water in the break tank, protecting
	against dry running.
	HIDISE tacking law, which protects the buildings pinguously by
	HiRISE technology which protects the building's pipework by
	ensuring the pumps start slowly during the initial fill process
	or following power failure to prevent potentially dangerous
	surges and consequent damage to the riser.

Specification

Suction connection	DN100
Delivery connection	DN100
Max operating flow (per pump)	9.4 l/s
Max operating pressure	8.1 bar
Closed valve pressure	8.9 bar
Maximum system pressure rating	10 bar
Speed	Variable
IP rating	IP55
Motor power	7.5 kW
Weight	TBA kg
Weight Pressure vessels N° x [Litres]	TBA kg 2 x [24]

Electrical Data

Single Phase 14 Variant		
Operating speed range	30 - 60Hz	
Per pump Current @ Full Load	25.1 A	
Total Current @ Full Load	75.3 A	

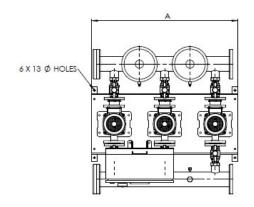

Three Phase 3⊕ Variant		
Operating speed range	30 - 60Hz	
Per pump Current @ Full Load	14.5 A	
Total Current @ Full Load	43.5 A	

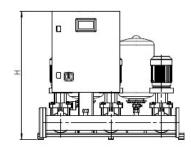

VT model Codes

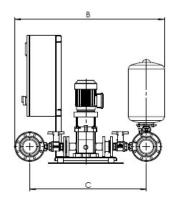

VT3-20-075T

Number of pumps]
Nominal flow (m³/h)	
Motor kW per pump	j j
