Pumps Portfolio.

All the pumps, spares and ancillaries you need from over 400 brands
From sourcing a single pump through to designing a complex system, Dutypoint is your go-to specialist for pumps and pump systems.

We supply a huge range of pumps and spare parts to customers throughout the UK but it is our technical knowledge and expertise in pumps that sets us apart.

Whatever your challenge, from identifying a 40-year-old pump and finding an alternative to providing same day delivery, we’ll work with you to ensure you get the right product, at the right price, when you need it.

Dutypoint. Setting the bar.

THE DUTYPOINT DIFFERENCE
- We have over 40 years of pumps knowledge and expertise to call upon to help solve your pumped system challenges
- We have access to over 400 major pump brands and some obscure ones too!
- We have a substantial stock holding, ensuring we always have what you need, when you need it
- We are there when you need us: by phone, email or live chat from 6:30am-5pm Monday-Friday
- We offer flexible delivery options to suit your needs including same day and next day delivery to anywhere in the UK and ROI
- We offer a sourcing service - challenge us to find the most obscure of pumps for those really difficult requests, we won’t let you down!
- We offer exclusive pump brands such as HCP, that no one else in the UK can supply
With over 40 years of pumps knowledge and expertise to call upon combined with a comprehensive range of pumps suitable for every application from domestic to industrial, we have every confidence that we can solve whatever pumped system challenge you give us.

**SUBMERSIBLE PUMPS**

Submersible pumps include drainage pumps for cellars and sumps, sewage pumps for pumping waste water to the mains sewerage, well pumps for irrigation and borehole pumps for private water supplies. We carry large stocks of quality submersible pumps from the major manufacturers including an exclusive range from HCP.

**WASTE WATER PUMPS**

Submersible pumps for sewage, waste water, solids-laden waste, drainage water, storm water and other slightly dirty and dirty water. Available with channel, vortex, screw and cutter impellers, and from all the major brands.

**CIRCULATOR PUMPS**

Pumps for circulating liquid in heating and cooling systems and for sanitary hot water recirculation. Our range includes A-rated, high efficiency domestic and commercial circulator pumps from leading brands including Grundfos, Lowara, Wilo and DAB.
**MULTISTAGE PUMPS**
High pressure, vertical and horizontal centrifugal pumps designed to pump liquid at high pressure. These pumps can be used in domestic water pressure boosting, high pressure liquid circulation and various industrial applications. All major brands stocked.

**END SUCTION CENTRIFUGAL PUMPS**
Simple, versatile and available in a range of materials to suit the application including cast iron and stainless steel. These pumps are typically single impeller centrifugal pumps, designed to pump liquid at high volume and relatively low pressure. Brands stocked include Lowara, Ebara and DAB.

**COOLANT PUMPS FOR MACHINE TOOLS**
Designed for pumping machine tool coolant and cooling lubricants, mounted on top of a tank, these suds pumps are widely used with bandsaws and CNC lathes. Available in a variety of stem lengths to suit different tank depths. Brands stocked include Grundfos and Osip.

**PROGRESSIVE CAVITY PUMPS**
Progressive cavity pumps can be used for cellar drainage, septic tank emptying, irrigation, water supply and transfer, diesel, water based inks, vegetable oils and non-aggressive chemicals.

**WRAS APPROVED PUMPS**
We stock a comprehensive range of pumps that are fully approved by WRAS, the Water Regulations Advisory Scheme.
ELEMEN ULTRA HIGH PERFORMANCE HOT WATER CYLINDERS

The Element Ultra High Performance range of cylinders by Dutypoint, are specifically developed for boosted hot water systems in high end residential and light commercial properties which have a greater demand of high pressure and high flow.

Where many ranges only go to 3.5 bar, our comprehensive range continues up to 6.0 bar for more demanding projects. Every cylinder has larger 28mm connections and is available in a wide variety of capacities to suit the demands of the property.

BOOSTER SETS

The Dutypoint range of booster sets offers an ideal solution for every project. Our WRAS approved booster sets are available to match any project specification. Whether you’re dealing with limited space, an abnormally-shaped plant room, high flow rate requirements, or the need for zero downtime, we will be able to create a package to suit your precise requirements.

HP25 CAT 5 COMBINED BOOSTER AND TANK SYSTEM

The HP25 from Dutypoint is a combined break tank and end suction booster pump system designed for category 5 applications. The set is a free-standing, quiet-running unit with integrated electronic pressure controller mounted on top of the tank. The tank is constructed from 25mm insulated GRP with a cat 5 AB air gap and ½” equilibrium inlet float valve. The unit also features low level protection.

The system is ideal for washdown applications such as bin washing, window cleaning and food processing.
ScubaTANK™ is a fully-contained water pressure booster system that is designed to increase the mains water pressure in a variety of properties. Designed for maximum water storage with minimum footprint, the GRP insulated ScubaTANK® features integral WRAS approved submersible pumps, mounted inside the tank, resulting in extremely quiet operation. Smaller models are designed to fit through a standard door making them ideal for retrofit applications.

PACKAGED PUMP STATIONS
Our comprehensively range of standard and bespoke packaged systems includes polyethylene, GRP, stainless steel and concrete tanks in a wide choice of sizes.

PRESSURISATION UNITS
Dutypoint Quantum pressurisation units feature the latest innovations in sealed heating system maintenance. With intelligent microprocessor control, full BMS integration capabilities and a choice of units to suit the installation, the Quantum range provides for the needs of any installation.

BOOSTER SET WITH INTEGRATED ELECTROMAGNETIC WATER CONDITIONER
Combining two innovative products into one packaged system. The Dutypoint EC water conditioner reduces energy consumption and extends the life of plant equipment by eliminating the build-up of hard calcareous lime scale, without introducing harmful chemicals or additives. As the EC is a physical water conditioner, water quality is maintained; none of the essential minerals present in potable water are removed through the treatment.
Dutypoint offer a wide range of spares and ancillaries to ensure you always have access to the parts you need to repair and refurbish your customers’ equipment, whether it is spare parts for a pump or components to facilitate installation.
